Information Security Policy

At OhmyFi, protecting the information of our customers and stakeholders is fundamental. That's why we are committed to security and trust. We work tirelessly to ensure the confidentiality, integrity, and availability of all the information we handle.

Our security strategy covers all company information assets, including processes, employees, clients, users, and other stakeholders.

We strive to provide a secure environment in which our clients can fully trust, especially within our captive portals. We ensure that every aspect of our operation complies with the highest security standards to offer a safe and reliable experience.
